

Crafty Links

Hi Crafters,

With learning new things comes a lot of reading, downloading and gathering goods, both digitally and physically from stores and trust me when I say I've done a lot of all 3 since this journey began..

I wanted to share some of my favorite sites with you for fonts, svg's, prints, clipart, vectors and other useful crafty things... The tips and tricks you will find are amazing and among the links are some of the best crafters out there. You can subscribe to these sites and get freebies in your email, daily or weekly depending on the site, most also have youtube videos so watching and reading = learning, there is just so much information out there, its ridiculous.

Some of the sites have multiple purposes so I will add them to all the lists but not link them every time. 😊

Please remember MOST of the files you can Download are suitable only for free, personal use, not to sell or use on items you sell. Most have full versions you can purchase or licenses you can purchase, please read the TOS, Angel Disclaimer, Copyright, etc on their websites or READ ME files in the zips. I hope this helps your crafting endeavors.. Enjoy!! *TOS = "Terms Of Service"

In Addition it is known that Disney has now really set their sights on copyright and trademark infringement of all Disney, Disney related and Disney Subsidiary Companies, they have every right to sue anyone breaking these laws and have cracked down on doing so, especially if you are selling their logos, characters etc on your merchandise online. Do the right thing, get permission from Disney to use their products and likeness or Do Not Use them at all for monetary gain.
